Paul Linck Brand Statement

Paul is a Software developer with over 30 years experience in the software business serving in various roles throughout that time. He evolved through many different platforms and methodologies and continues to stay skilled with current trends in software development processes and technologies. He worked on projects using everything from punch cards, COBOL, batch/JCL and C in the 80's to Swift, C# and full stack web HTML/CSS/Javascript in use today. He served in many roles including programer, analyst, instructor, project manager, executive, business owner and entrepreneur. He has also assisted several startup companies with funding and business consulting.

Currently, Paul spends his time developing mobile and web applications with the latest technologies including Swift/iOS, C#, and full stack dynamic web development (e.g. HTML/CSS/Javascript). In 2019, Paul completed an intense 6-month professional bootcamp at GA Tech immersing himself in all aspects this full stack environment. He is highly skilled in tools and languages supporting the latest software development trends. He is also Training Specialist with experience in stand-up and classroom settings.

His passion is in technology and remains a skilled developer, teacher and entrepreneur.
